(54) COSMETIC

(57)Abstract:

PROBLEM TO BE SOLVED: To obtain a cosmetic containing complex silicone powder and improved in extensibility and inunction feeling.

SOLUTION: This cosmetic contains a complex silicone powder obtained by applying a polyorganosylsesquioxane resin of the formula, $R_2SiO_{3/2}$ (R_2 is an alkyl, an aryl, an alkenyl, an aralkyl, a monovalent halogenated hydrocarbon, etc.) to silicone rubber globular fine particles of the formula, $(R_1SiO)_a$ [R_1 is an alkyl, an aryl, an alkenyl, an aralkyl, a monovalent halogenated hydrocarbon, etc.; (a) is 5-500]. A method for applying the resin is as follows. An alkaline substance or an alkaline aqueous solution and an organotrialkoxysilane are added to a water dispersion of silicone rubber globular fine particles having 0.1-100 μ m average particle diameter. Thereby, hydrolysis and condensation reaction of the organotrialkoxysilane is carried out. The polyorganosilsesquioxane resin in an amount of 1-500 pts.wt. is applied to 100 pts.wt. silicone rubber globular fine particles.
